

UNESCO CREATIVE CITIES NETWORK EXPLICIT ENDORSEMENT

Urban areas are today's principal breeding grounds for the development of new strategies, policies and initiatives aimed at making culture and creativity a driving force for sustainable development and urban regeneration. In this context Şanlıurfa is willing to apply for UNESCO Creative Cities Network (Music) 2021, believing that cooperation and the sharing of experience and knowledge is crucial for making creativity a lever for urban development and conceiving of new solutions to tackle common challenges. Our existence in the network will provide unparalleled opportunities, to draw on peer learning processes and collaborative projects in order to fully capitalize the creative assets and use this as a basis for building sustainable, inclusive and balanced development in economic, cultural, environmental and social terms, and that's not only on the level of our city but it will extend beyond national and worldwide UNESCO creative cities. Moreover, our selection in the UCCN will support our location on the map of implementing and achieving the UN 2030 Agenda for Sustainable Development, by building on culture and creativity to develop innovative and inclusive urban strategies.

Thus we provide our fully support to Şanlıurfa Metropolitan Municipality to enhance Şanlıurfa's chances during and beyond the application process, with an emphasis on the necessity of supporting the whole activities and projects to be stated in the application file.
